

Pierrel Research is a full-solution Contract Research Organization (CRO) providing drug development services to the pharmaceutical, biotechnology and medical device industries. Our Global Headquarters are in Zurich, Switzerland, with Operational Headquarters in Essen, Germany, Philadelphia, United States, and Saint-Petersburg, Russia.

Currently we are recruiting a:

CHIEF TECHNOLOGY OFFICER

(LOCATED IN ESSEN, GERMANY OR MILANO, ITALY)

As a Chief Technology Officer (CTO) you will be reporting to the CEO of the company and will be responsible for supervising and managing the company Clinical Trial Technology and IT team. In particular you will be responsible for indicating the company's technical vision and leading all aspects of the company's technology introduction. Furthermore, the CTO will play an integral role in the company's strategic direction, development, and future growth.

Responsibilities:

- Lead the execution of strategy for the introduction of new technology solutions through partnerships and external relationships
- Manage the CTT and IT team. Oversee new developments. Allocate specific roles and responsibilities, managing its needs and requirements, mentoring, and instill teamwork, ethic and motivation
- Identify company operations' area that may benefit of technological improvements. Propose adequate and convenient solutions
- Align the IT vision and framework with the overall business strategy of the organization, deliver IT solutions to the various other units of the organization, ensuring that all IT assets and systems are functioning smoothly for the employees and extended workforce of the organization
- Anticipate and react to major technology changes to ensure the maintenance of company leadership in the competitive CRO landscape
- Establish technical standards and ensure adherence to them for company operations
- Set up the policies and structures for managing the IT infrastructure (organization's computers, servers, peripherals, telecommunication systems, Internet connectivity networks, software applications, and data centers).

Requirements:

- Demonstrated ability to interpret technology and market trends as a foundation for introducing innovation into the clinical research business
- Proven managerial skills and problem solving attitude.
- Excellent interpersonal and communication skills.
- At least 10 years in engineering or equivalent job, with some years in an executive-level position.

Interested? Then, we look forward to receive your CV in English with a current photo, and a brief letter with your professional and salary expectations, work location (Germany or Italy) at the following e-mail address: office.europe@pierrel-research.com with the ref. **CTO Europe**
